DETAILED ACTION

Response to Amendment

The amendment filed on 2/4/2005 has been received and acknowledged to be found persuasive in view of the prior art of record.

Allowable Subject Matter

Claims 1-26 and 33-66 are allowed.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The prior art of record (i.e. Yang) does describe a spin addition method of manufacturing a crystalline semiconductor using a metallic element for promotion of crystallization on an insulation layer followed by an amorphous layer that is subsequently heated, but the prior art fails to describe, suggest or teach *inter alia* the invention of asserting a rotational acceleration speed in the spin addition method, as claimed. The claims, therefore define over the prior art. Any comments considered necessary by applicant must be submitted no later than the payments of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
